

WHY TRAP?

Feral cats are fearful of human contact and cannot be handled in the same way a pet cat can be. Touching a feral poses a risk of injury to cat and caretaker alike. We recommend humane traps which can confine the cat safely, with no injury until time of surgery. Traps can be purchased locally through Harvest Freight, local feed and garden stores, and ordered online. If your trapping needs are small, check out these local groups which sign out traps for a refundable deposit.
